PAY SERVICES

Company Profile

A Pay is your professional, compliant Payroll Partner providing a range of outsourced services to help with the management, retention and wellbeing of your temporary contractors and permanent staff.

Working with My Digital has been an exceptional experience from the start. The implementation process was incredibly quick and smooth, even under the tight turnaround we were working with. Data migration, which is often a challenging task, exceeded our expectations with its efficiency and ease. The transition was seamless, with no additional feedback needed to improve the process.

The support from My Digital has truly stood out. Across the sales, contracts, implementation, and go-live phases, the support team has been the best we've encountered compared to other systems we've tried. They have gone above and beyond, providing invaluable assistance and making a significant impact on our journey.

Since adopting My Digital, we've seen improved internal efficiencies, especially in the onboarding process.

Overall, our journey with My Digital has been unparalleled, especially compared to past software experiences. Previous implementations were often rushed and resulted in payroll errors, but My Digital's meticulous and well-executed process earns a solid 10/10. We're grateful for their expertise and support throughout this journey.
